

A PLAYCORE Company

NFUSE™

MODULAR PLAY SYSTEM

NFUSE - CONNECTING FUN

Playcraft Systems continues to advance the future of play with the introduction of the NFUSE Modular Play System. The NFUSE line strikes the perfect balance of innovative design and functional play spaces, creating an invigorating playscape every time. Challenging cables, elevated climbers and social

hangout spots are ideal for the 5-12 user. Connect interchangeable bays and extensions, or link between play systems to infuse new play opportunities. Modules, freestanding and hybrid structures can be tailored to fit any playground footprint and budget.

THE NFUSE SYSTEM

NFUSE CORE ELEMENTS

HUB

Defines the major style and functionality of the NFUSE freestanding structures.

BAY

Provides a variety of play activities within each structure or module.

FRAME

Supports the Bay by becoming the bridge between play events.

NFUSE EXTENSIONS & EXTRAS

SHADE SAIL

Provides a colorful focal point in a shape unseen in the industry today.

ARCH BAY

Expands the bay design for a variety of play elements.

EVENT EXTENSION

These play expansions provide additional climbing events and activities.

EXPLORER'S ARCH BAY

Paired with an inner bay, this multi-functional climbing arch promotes physical, social and cognitive development. The suspended outer rings create a comfortable and attractive seating space, which are great for social hangouts or planning the next adventurous route.

TRI-RING BAY

A creative adaption of our popular Revolution Tri-Ring, this bay features a secured swaying motion from ring to ring. Kids can travel across, transition through the rings, or navigate up to the topside of the bay for continued fun and exploration.

SLITHER CLIMBER EXTENSION

Expand the play of any NFUSE frame with these roto-molded climbers. The back-to-back Slither climbers are set at varied heights to improve balance and agility. The Slither Climber is the perfect component to functionally link with other ground-based play events.

POPULAR MODULES

Unique freestanding play events designed to create memorable experiences. Fuse them together or to a structure for added variety.

Module 1A

Age Range: 5-12
Use Zone: 29' x 25' (8.9m x 7.6m)

Module 1B

Age Range: 5-12
Use Zone: 30' x 27' (9.2m x 8.3m)

Module 2A

Age Range: 5-12
Use Zone: 31' x 26' (9.5m x 7.9m)

Module 2B

Age Range: 5-12
Use Zone: 30' x 31' (9.2m x 9.5m)

POPULAR NFUSE STRUCTURES

Incorporate any customizable modules with the Hex Net Hub. Choose from a variety of shade options for full or partial coverage.

NF536B5FA

Age Range: 5-12
